HIGHEST SPEC TROUGH ON THE MARKET

Built to outperform and outlast, our troughs feature synthetic fibre, steel reinforcement, and 45MPa computer-batched concrete for unmatched strength and durability. With 70mm thick walls and a 100mm thick base, they're designed for maximum lifespan in the toughest conditions.

EASY TO CLEAN

Our troughs feature a tapered centre drainage system aligned with a 4" outlet, ensuring efficient water flow and minimal residue. The sweep-through access between the float and drinking areas makes cleaning quick and hassle-free.

EASY ACCESS

Our troughs feature a tapered centre drainage system aligned with a 4" outlet. The combination of our smooth finish and sweep-through access between the float and drinking area makes cleaning quick and hassle-free.

BUILT TO LAST

Our troughs are 100% Stockproof. Each trough is poured as a single solid piece, delivering superior strength and stockproof reliability. Designed as a long-term investment, these troughs are built to serve today — and the next generation.

FULLY TESTED

Tested with cattle, sheep, and horses, our troughs are built to withstand real-world wear and tear. Say goodbye to empty tanks and trough damage caused by curious or itchy livestock — these are tough enough to handle it all.
